Professional Summary

Insightful Information Technology student who excels at **AWS, GCP and Gen AI**. A creative problem-solver with a strong background in **Data Science, Artificial Intelligence, and Cloud**, who excels in transforming complex ideas into actionable strategies, eager to collaborate and drive impactful change.

Education

Chaitanya Bharathi Institute of Technology, BE in Information Technology 2021 – 2025

- GPA: 8.0/10.0

Narayana Junior College, Intermediate - Maths, Physics, Chemistry 2019 – 2021

- Percentage: 97.4

Skills

- **Relavant Skills:** AWS, GCP, Gen AI, Data Science, Machine Learning, Deep Learning, Artificial Intelligence, NLP, Flask
- **Programming Languages:** C++, C, SQL, Python, Html, CSS, Javascript, Nodejs, React js, Express js, LlamaIndex, AI tools
- **Softwares and Tools:** Google Cloud Platform, Amazon Web Services, Flask, MySQL, PostgreSQL, Visual Studio, Tableau, Power BI, Figma, AutoCAD, Tomcat apache, Big Data Analytics

Professional Experience

Artificial Intelligence and Machine Learning Intern, SmartBridge – Gachibowli, Aug 2024 – Oct 2024
Hyderabad

- Leveraging Advanced AI ML tools and implementing into projects based on AI, ML, Cloud, and Data Analytics.

Data Science Intern, Personify – Remote Aug 2023 – Sept 2023

- Conducted exploratory data analysis (EDA) on credit data sets to identify patterns, trends, and potential relationships for risk assessment and predictive modeling.

Projects

Paws Claws: The premium pet Emporium

- It is an e-commerce website for purchasing cats and dogs, built using Flask and deployed on AWS.

Text Summarization using T5 Transformers

- Developed a web application for text summarization using T5 Transformers and Hugging Face libraries, deployed with Flask for interactive user input.

Stock Price Prediction

- Stock price prediction using LSTM involves utilizing Long Short-Term Memory neural networks to analyze historical data and forecast future stock prices with improved accuracy.

Student LMS using MERN

- Student LMS using MERN stack leverages MongoDB, Express, React, and Node.js to create a dynamic, scalable learning management system.

Accomplishments

Associate Cloud Engineer - Google Cloud Platform

Generative AI - Completed Beginner, Intermediate and Advance courses in Generative AI

Dancer - Performed as a Backup Dancer at Dhee (Reality Show)
